

## PRODUCT CARE

- Bamboo wood is a natural product. The bamboo casing has been sealed with natural linseed oil to protect it from soiling and for a long service life.
- Do not use alcohol, benzene, thinner or acids to clean the cabinet.
- If the device is not in use for a longer period of time, be sure that your system is disconnected from mains power.
- Avoid permanent strain such as direct sunlight, extreme moist or dryness, exceptional cold or heat, mechanical vibrations or shock.
- When placing objects on unsealed surfaces, colour changes may occur at the contact points. In this case, we recommend treatment with the cleaning / care products suggested by the furniture manufacturer. To avoid colour changes, place the device on a suitable surface.
